Cautionary Statement

**If you are risk adverse, don't buy our stock.
Don't rely on anything in this presentation.**

This presentation contains certain forward-looking statements and information, including "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. The forward-looking statements and information expressed, as at the date of this presentation, McEwen Mining Inc.'s (the "Company") estimates, forecasts, projections, expectations or beliefs as to future events and results. Forward-looking statements and information are necessarily based upon a number of estimates and assumptions that, while considered reasonable by management, are inherently subject to significant business, economic and competitive uncertainties, risks and contingencies, and there can be no assurance that such statements and information will prove to be accurate. Therefore, actual results and future events could differ materially from those anticipated in such statements and information. Risks and uncertainties that could cause results or future events to differ materially from current expectations expressed or implied by the forward-looking statements and information include, but are not limited to, factors associated with fluctuations in the market price of precious metals, mining industry risks, political, economic, social and security risks associated with foreign operations, the ability of the corporation to receive or receive in a timely manner permits or other approvals required in connection with operations, risks associated with the construction of mining operations and commencement of production and the projected costs thereof, risks related to litigation, the state of the capital markets, environmental risks and hazards, uncertainty as to calculation of mineral resources and reserves, risk of delisting from a public exchange, and other risks. The Company's dividend policy will be reviewed periodically by the Board of Directors and is subject to change based on certain factors such as the capital needs of the Company and its future operating results. Readers should not place undue reliance on forward-looking statements or information included herein, which speak only as of the date hereof. The Company undertakes no obligation to reissue or update forward-looking statements or information as a result of new information or events after the date hereof except as may be required by law. See McEwen Mining's Annual Report on Form 10-K for the fiscal year ended December 31, 2016 and Quarterly Report on Form 10-Q for the quarter ended March 31, 2017, and other filings with the Securities and Exchange Commission, under the caption "Risk Factors", for additional information on risks, uncertainties and other factors relating to the forward-looking statements and information regarding the Company. All forward-looking statements and information made in this presentation are qualified by this cautionary statement. All currency information quoted in U.S. dollars.

To see end notes, technical disclosure, cautionary guidance, and cautionary note regarding NON-GAAP measures, go to www.mcewenmining.com/files/presentation_disclosure.pdf

Summarized Financial Results – Strong Earnings in 2016

	Three months ended Mar 31, 2017	Three months ended Mar 31, 2016	Year ended Dec 31, 2016
Realized Price per Gold Ounce	\$1,220	\$1,171	\$1,235
Realized Price per Silver Ounce	\$17.54	\$14.64	\$16.77
Sales	\$14,833	\$21,190	\$60,388
Costs Applicable to Sales	(7,136)	(9,162)	(28,661)
Gross Profit at El Gallo Gold*	\$7,697	\$12,028	\$31,727
<i>Gross Margin at El Gallo Gold</i>	<i>52%</i>	<i>57%</i>	<i>53%</i>
Income from San José Joint Venture	190	4,963	12,951
Mine Development Costs	(1,115)	(698)	(3,866)
Exploration Costs	(8,444)	(1,740)	(7,959)
G&A Costs	(4,293)	(2,768)	(12,734)
Net (Loss) Income	<i>\$(3,018)</i>	<i>\$12,985</i>	<i>\$21,055</i>
(Loss) Income per Share	<i>\$(0.01)</i>	<i>\$0.04</i>	<i>\$0.07</i>

Operations Update

Production Evolution

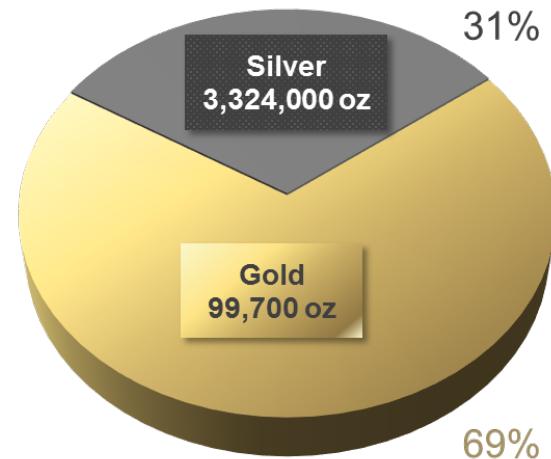

2016A Production

Q1, 2017A Production

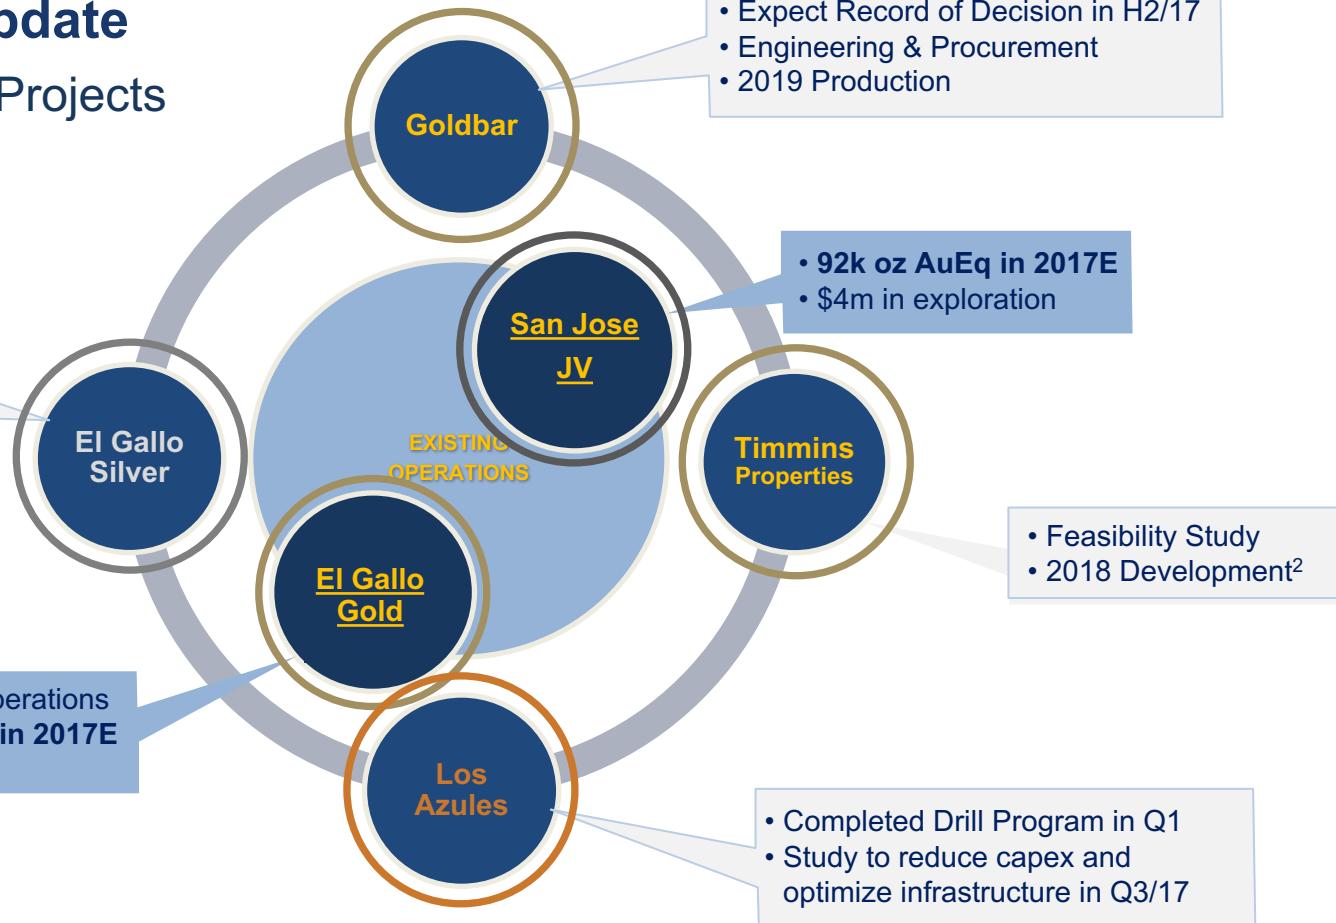

2017E Production

Gold / silver ratio 75:1. Based on internal estimates. Excludes Timmins properties.

Operations Update

Operations and Projects

(1) Execution decision dependent of project economics and silver prices. (2) Dependent on Feasibility Results

Growth Drivers

Diverse Sources

- **Developing New & Expanding Operations**
- **Mergers & Acquisitions**
- **Growth through Exploration**
- **Innovation**

Growth Drivers

Substantial Multi-Stage Pipeline

Cortez Trend, Nevada

- Gold Bar Project
- Exploration

El Gallo Complex, Mexico

- El Gallo Gold
- El Gallo Silver
- Exploration

Timmins, Canada

- 4 Projects
- Project Development
- Deep Exploration

Argentina

Los Azules

Minera Santa Cruz JV

- Exploration
- Study Stage
- Permitting
- San José Mine
- Exploration

Production Growth

2017 - Entering a New Stage

- Gold Bar construction expected to start
- El Gallo Silver construction decision point
- Exploration at El Gallo District on sulfide mineralization
- Feasibility for Timmins Properties' development
- Los Azules exploration and PEA

Production Growth

2018 – Exciting Transition Year

- Construction at Gold Bar - Late 2018 commissioning
- Expected construction at El Gallo Silver
- Final stage oxide mining at El Gallo Gold
- Opportunity for El Gallo heap reprocessing
- Development of Timmins Properties
- Initiating Permitting at Los Azules

Production Growth

2019 - Step Change in Production

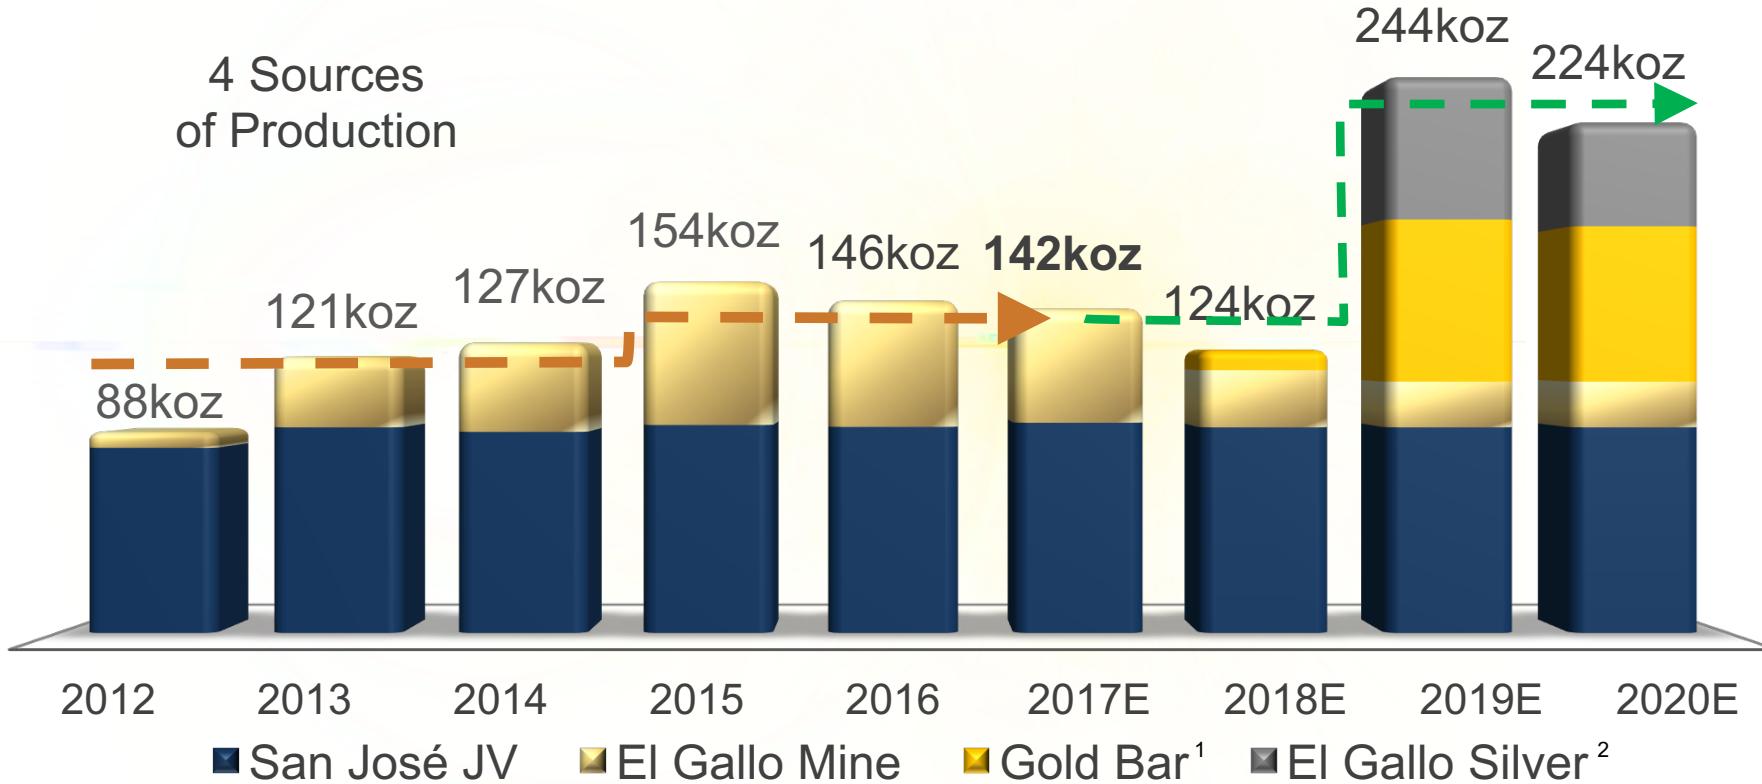

- Full production at Gold Bar
- High grade production from El Gallo Silver
- Residual production from El Gallo Gold
- Production from one of Timmins Properties
- Los Azules Permitting & Feasibility

Production Growth – Gold Equivalent Ounces

Not including recently acquired Timmins Assets

4 Sources
of Production

Production in gold equivalent ounces. **Gold / silver ratio 75:1.** 2017-2020 based on internal estimates. ¹ 2018 includes ramp-up production from Gold Bar of 9k oz (Estimated 75k oz annualized) ² 2019 includes El Gallo Silver estimated 30k gold equivalent production assuming a silver price of over \$21.00 per oz.

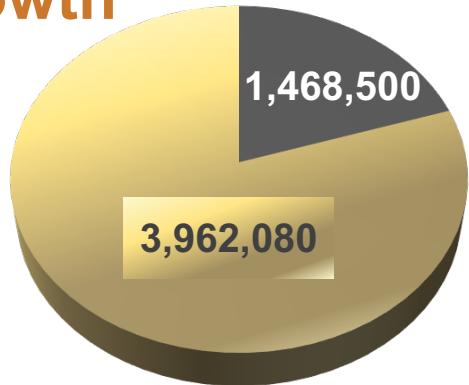

Resource Growth

Resource impact from Lexam VG Acquisition

Resource base growth of over **30%**

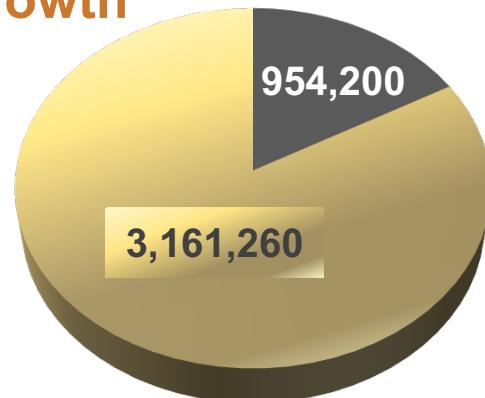

M&I Resources (oz)

37% Growth

Inferred Resources (oz)

30% Growth

Development Pipeline: Gold Bar – Gold

Cortez Trend

Nevada, USA

Very Positive Economics at \$1,150 / oz Gold¹

Low Capex, Open Pit, Heap Leach, 1.1 gpt oxide ore

Upside – Oct 2015 Feasibility Study

Gold Price	\$1,150	\$1,250	\$1,350
After Tax IRR	20%	30%	40%
Payback	3 yrs	2.4 yrs	1.9 yrs

¹Feasibility Study (Oct 2015) @ \$1,150 / oz

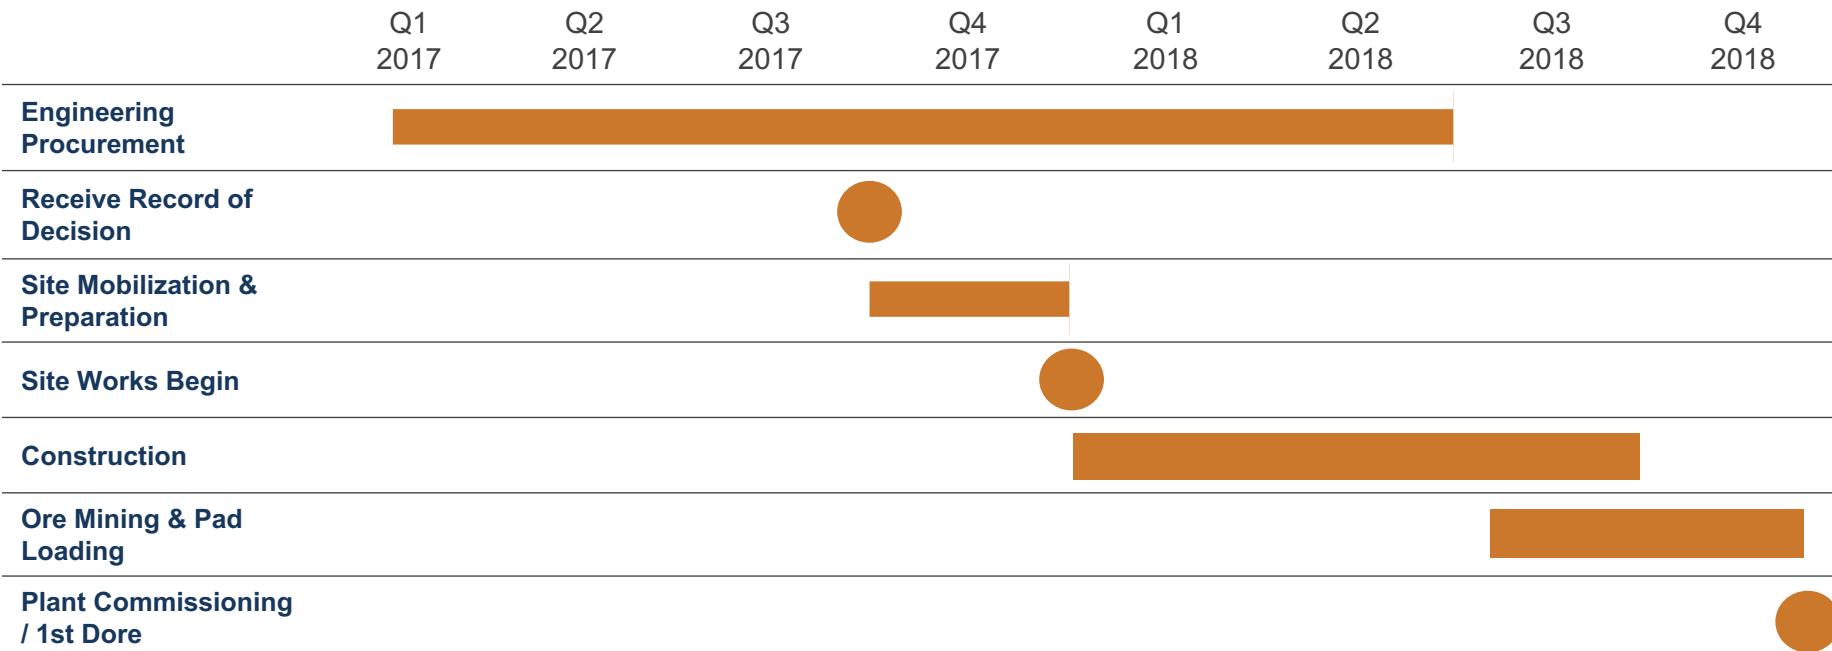

Development Pipeline: Gold Bar – Gold

Cortez Trend

Nevada, USA

Progress To Date and Next Steps

Development Pipeline: El Gallo – Gold

Nearing End of Life

- Oxide, leachable ore to finish in 2018
- Residual heap leaching
- Options to recover unleached gold and silver in heap
- Brownfield exploration for sulfide-hosted mineralization
- Potential conversion into polymetallic operation

Samaniego Pit

Central Pit

Development Pipeline: El Gallo – Silver

Operational Continuity & Growth

- Internal studies in progress
 - Capex & Opex Reduction
 - Fast Track Engineering and Construction
 - More robust economics relative to silver price variability
- Nearing construction decision – expect in Q4, 2017
- Strategic development for unlocking district potential

Development Pipeline: Timmins, Canada – Gold

Key Features

1. Great address

Near several producing mines

70 Moz gold produced in Timmins Camp

2. Four Projects

- Buffalo-Ankerite
- Fuller
- Paymaster
- Davidson-Tisdale

3. Total Resource¹

M&I: 1,468,500 oz Au (total open pit and underground)

Inferred: 954,200 oz Au (total open pit and underground)

4. Exploration Upside

¹NI 43-101 Resource, 2013, see appendix for tonnage, grade, ounces

Development Pipeline: Timmins, Canada – Gold

Upcoming Production Plan

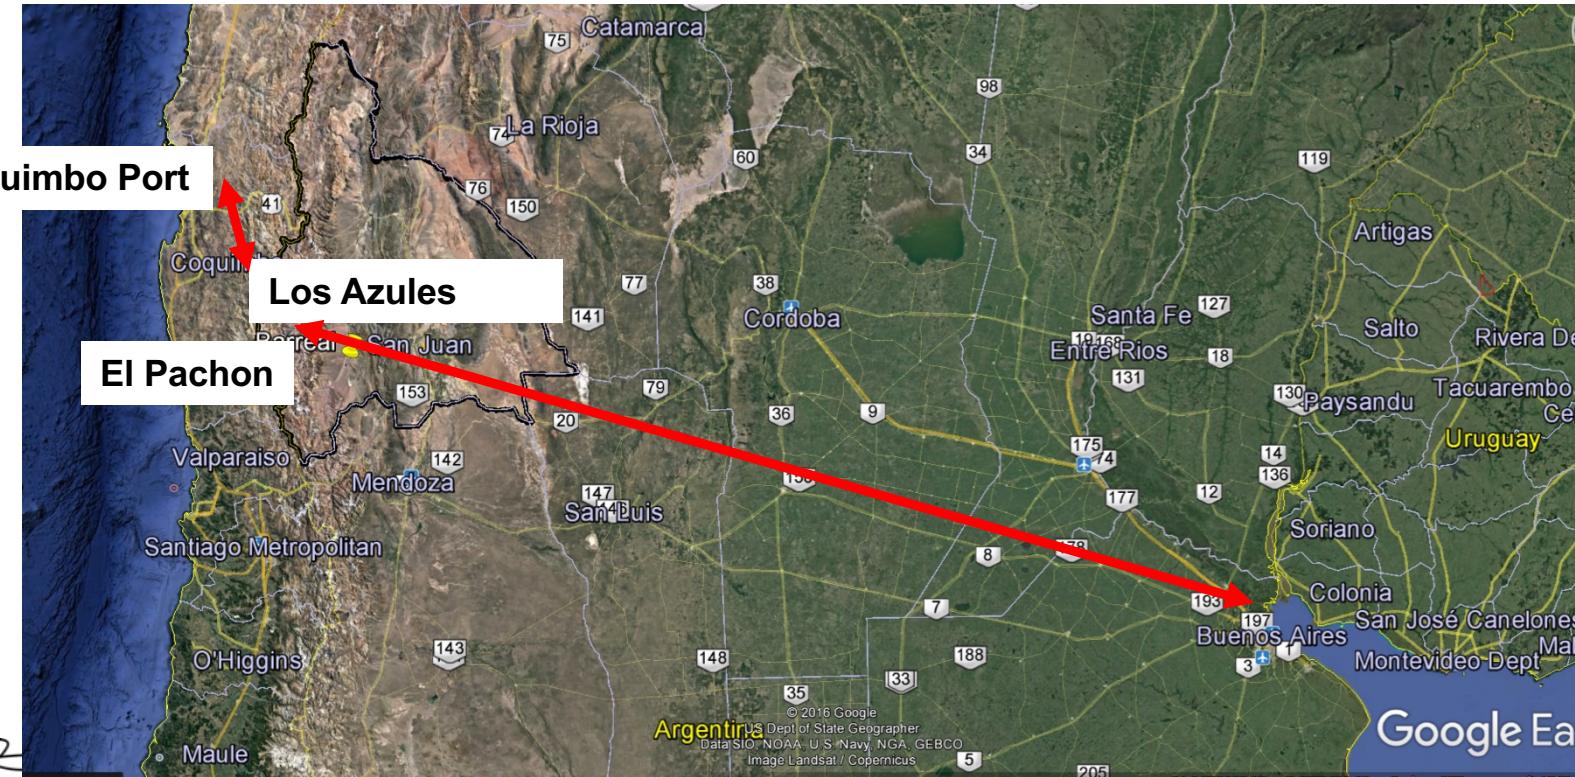

- **Multiple projects to be developed in sequence = long operating life**
- Internal studies in progress - first feasibility in Q1 2018
 - Establish optimum development sequence
 - Take advantage of process capacity available in Timmins
- Permitting in progress
- Exploration being restarted

Los Azules Copper – Potential Bi-National Project

1000+ kms from Altantic Port in Argentina

200 kms from a Pacific Port in Chile

1,500,000,000 tons

@ 0.43%

A potential world
class copper mine

Long Mine Life

150,000 tons of
copper per annum in
concentrate over 30+
years mine life

North

South

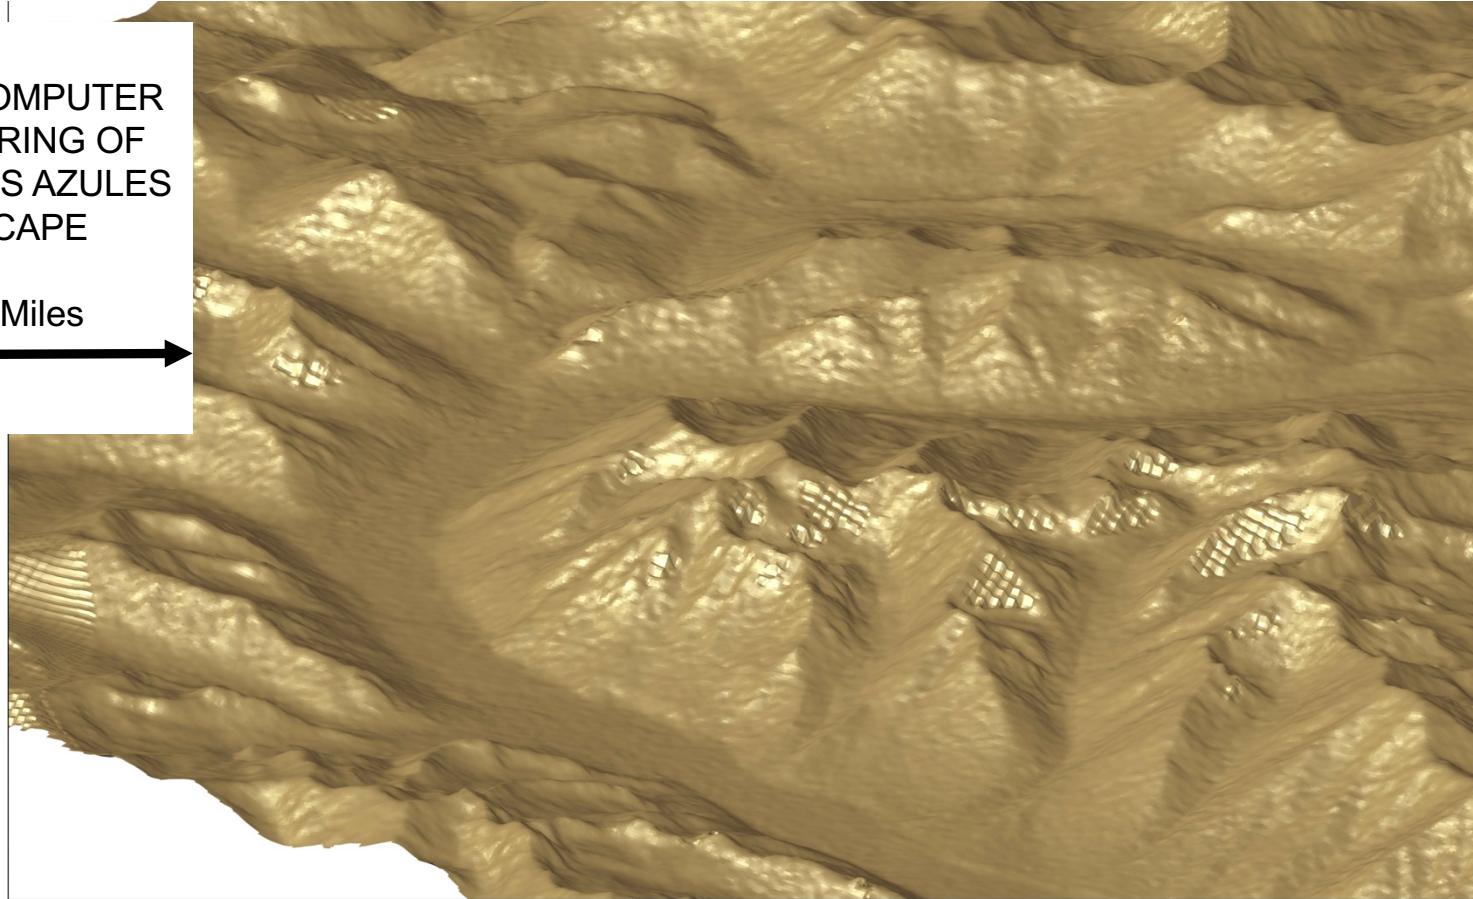

**Phased Implementation Approach for Mineral Processing at Los Azules.
Phase 1 = 80ktpd, Phase 2 = 40ktpd coming on line in year 5 and funded
from cash flows**

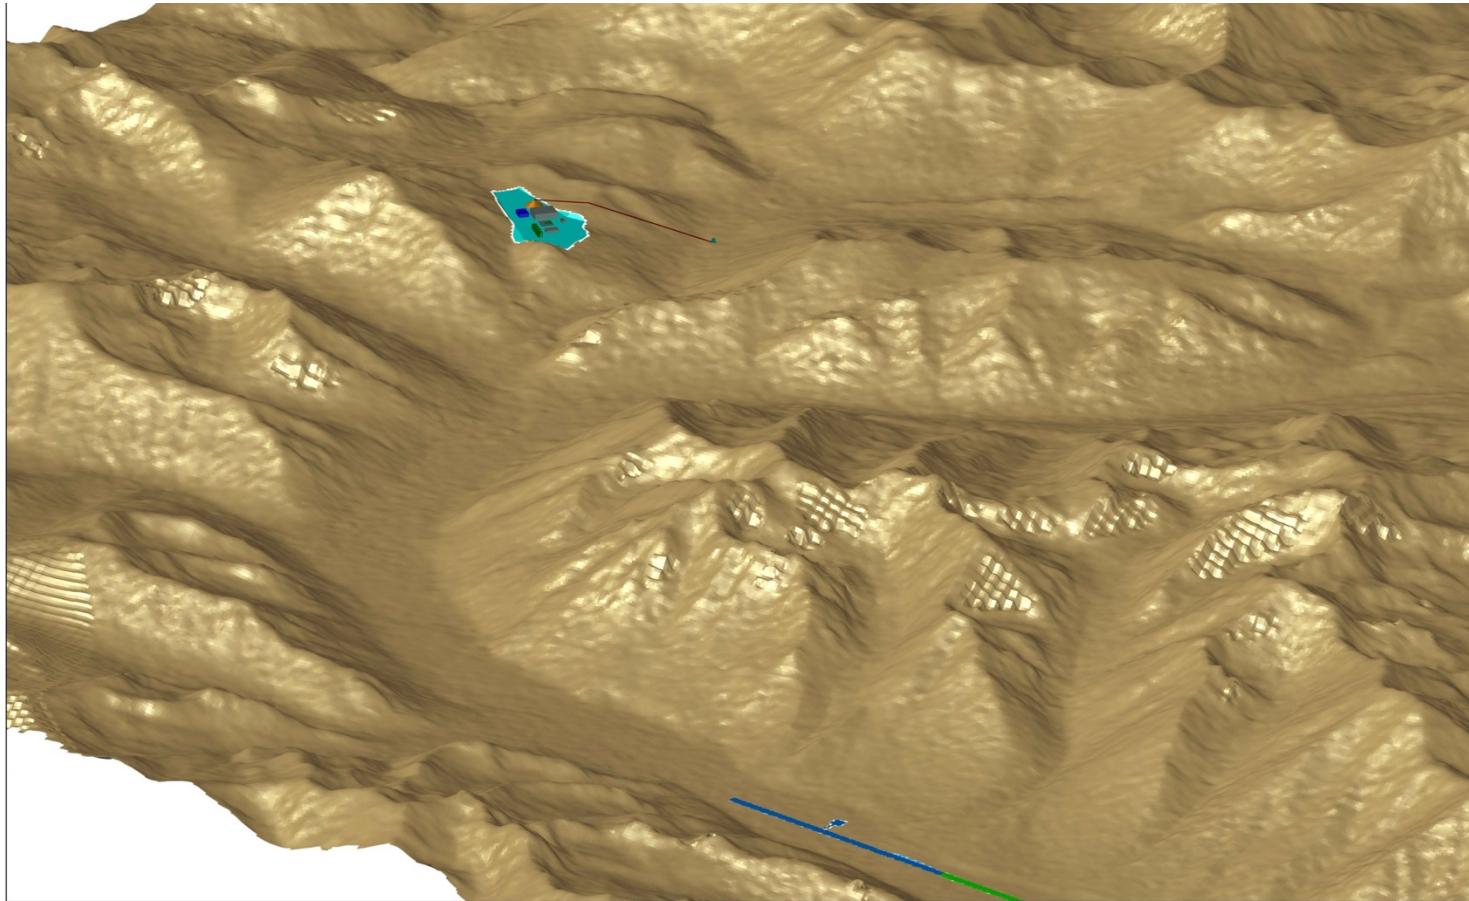

Los Azules Project

A 3D COMPUTER
RENDERING OF
THE LOS AZULES
LANDSCAPE

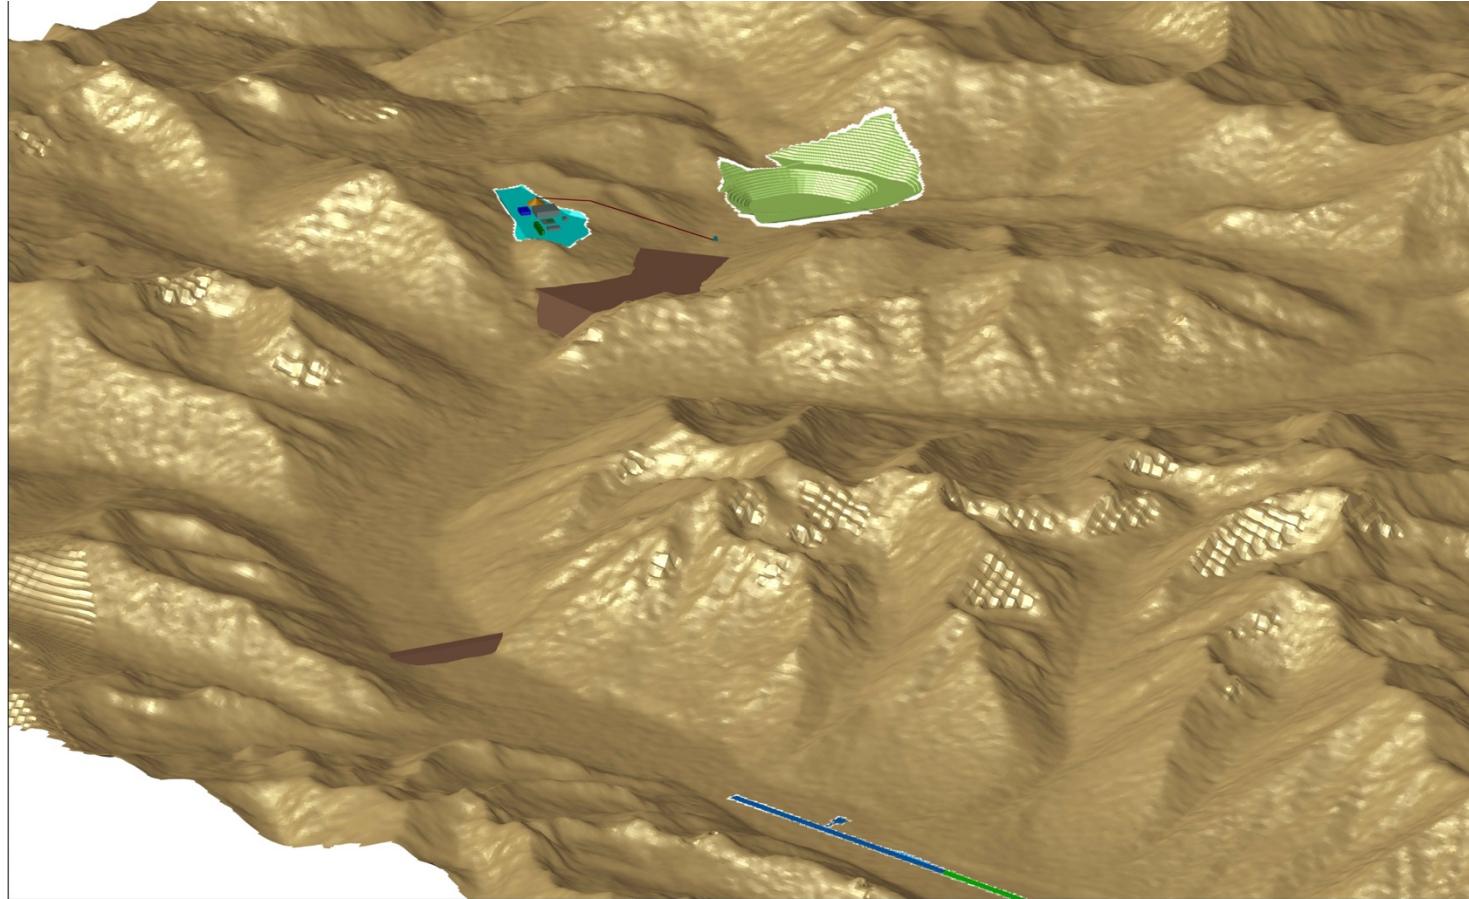

2 Miles

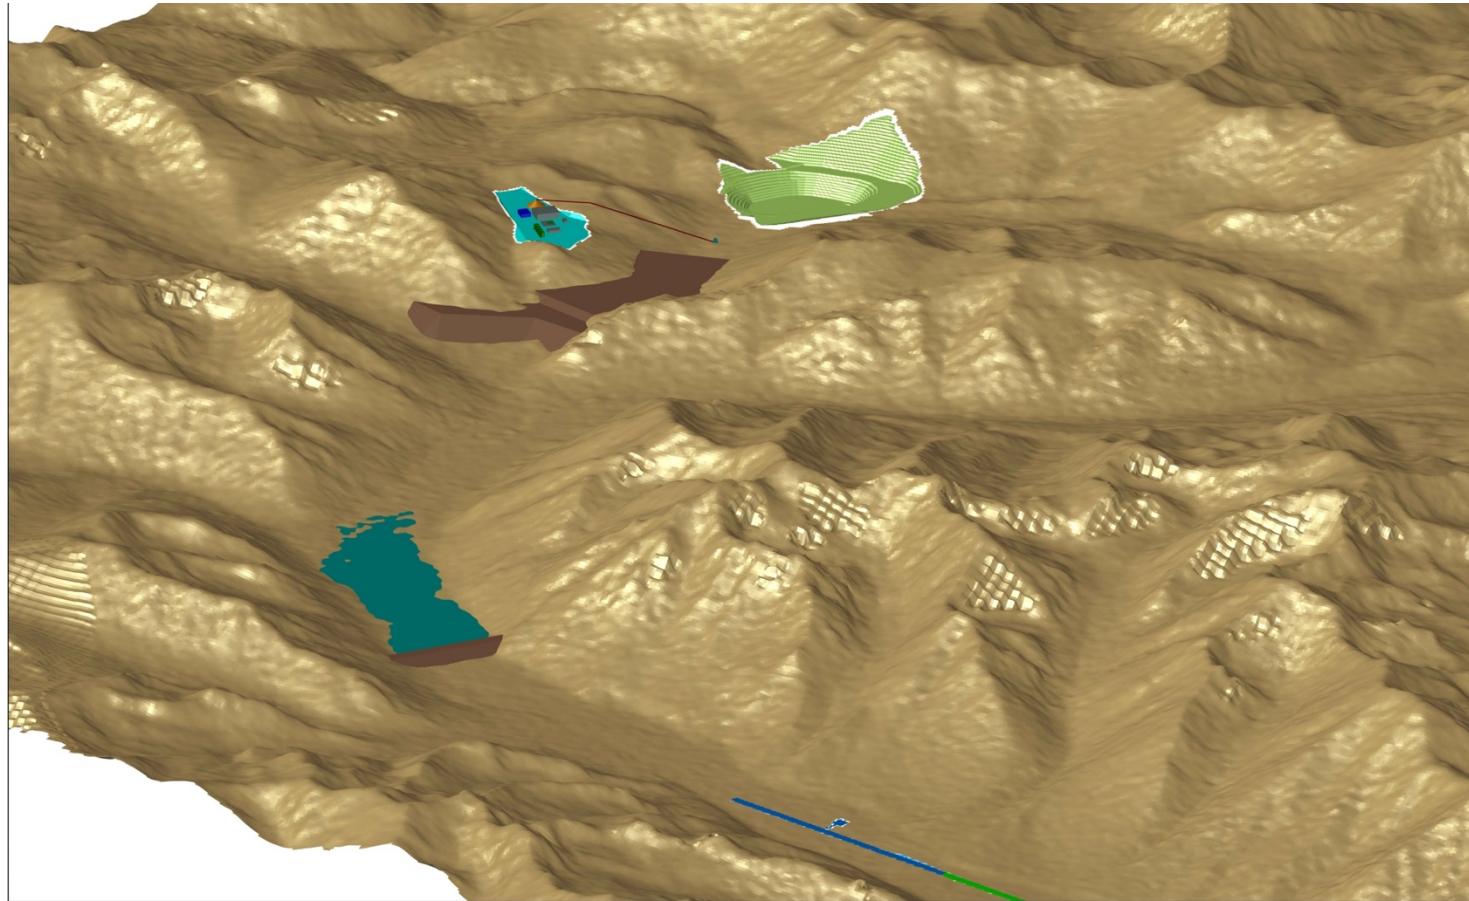

Los Azules Year 2

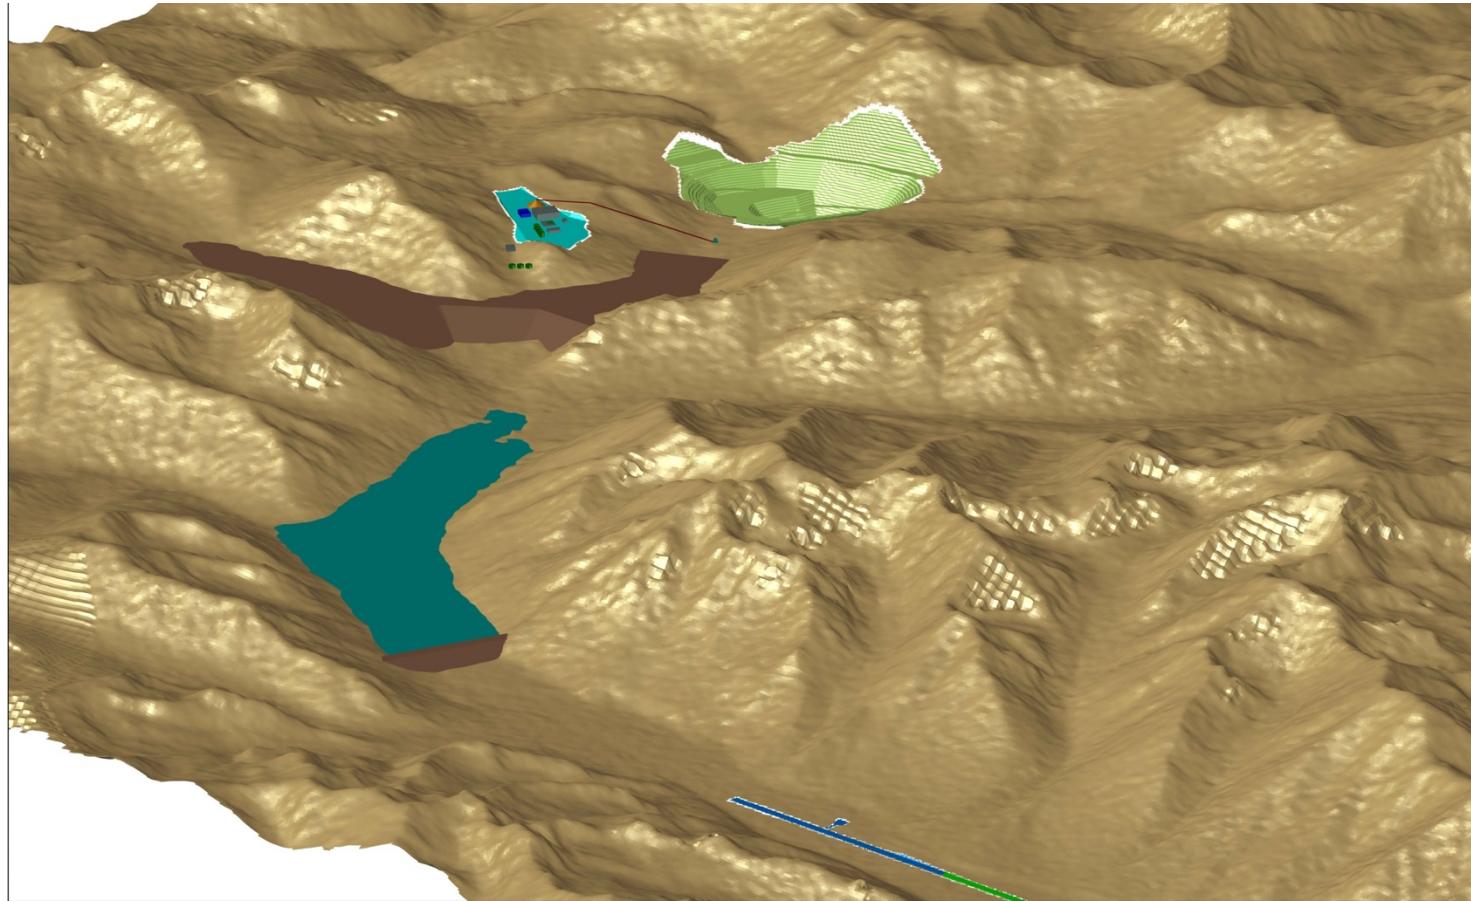

Los Azules – Year 0 Prestripping Done, 1st Phase of Concentrator, Stage 1 of Tailings Dam & Airstrip Completed

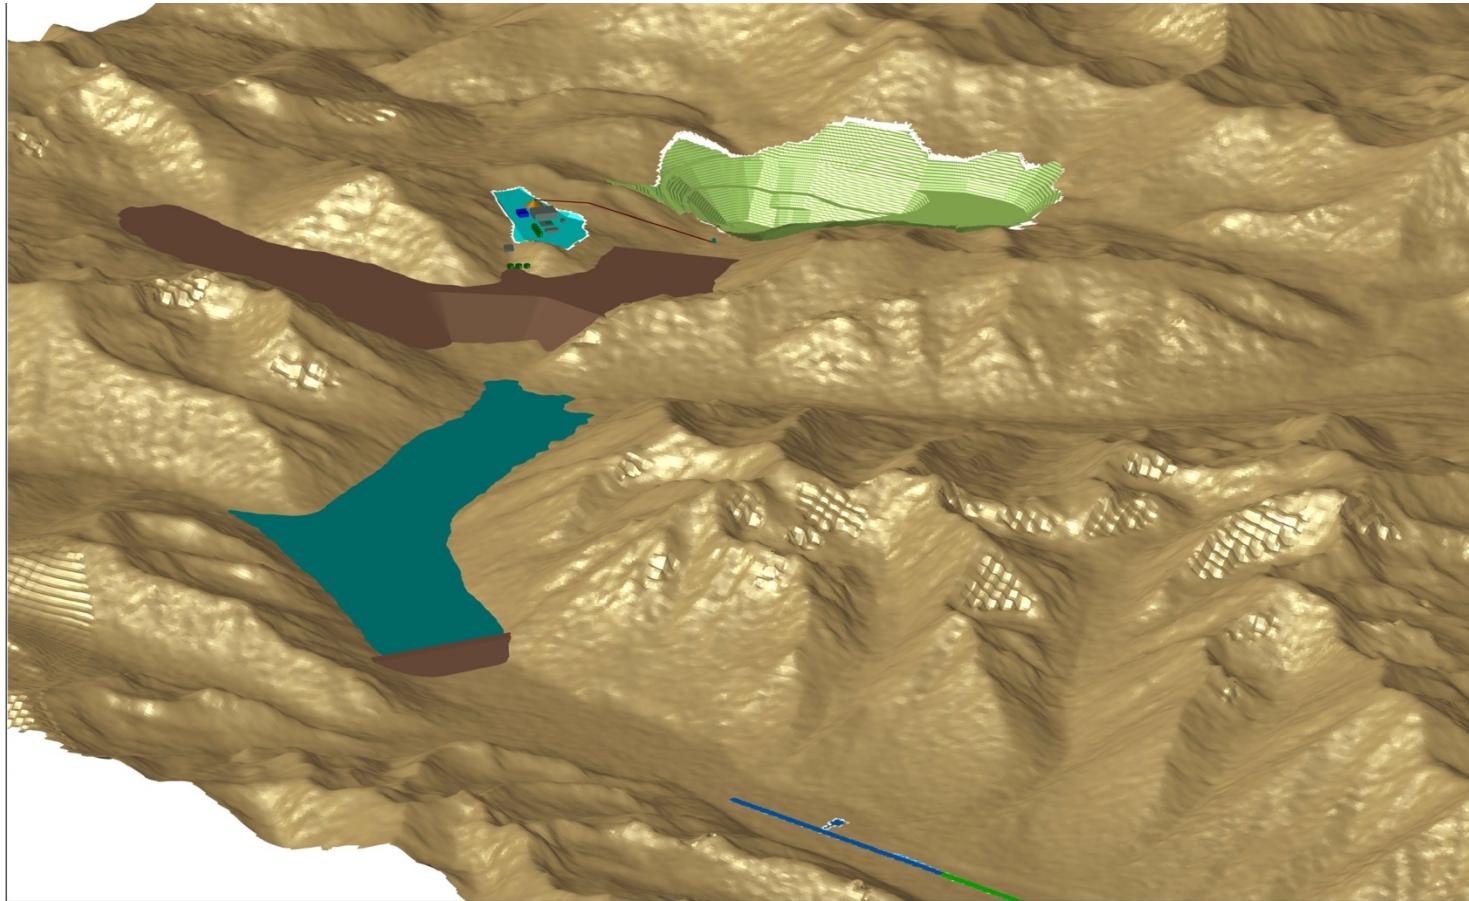

Los Azules Year 5

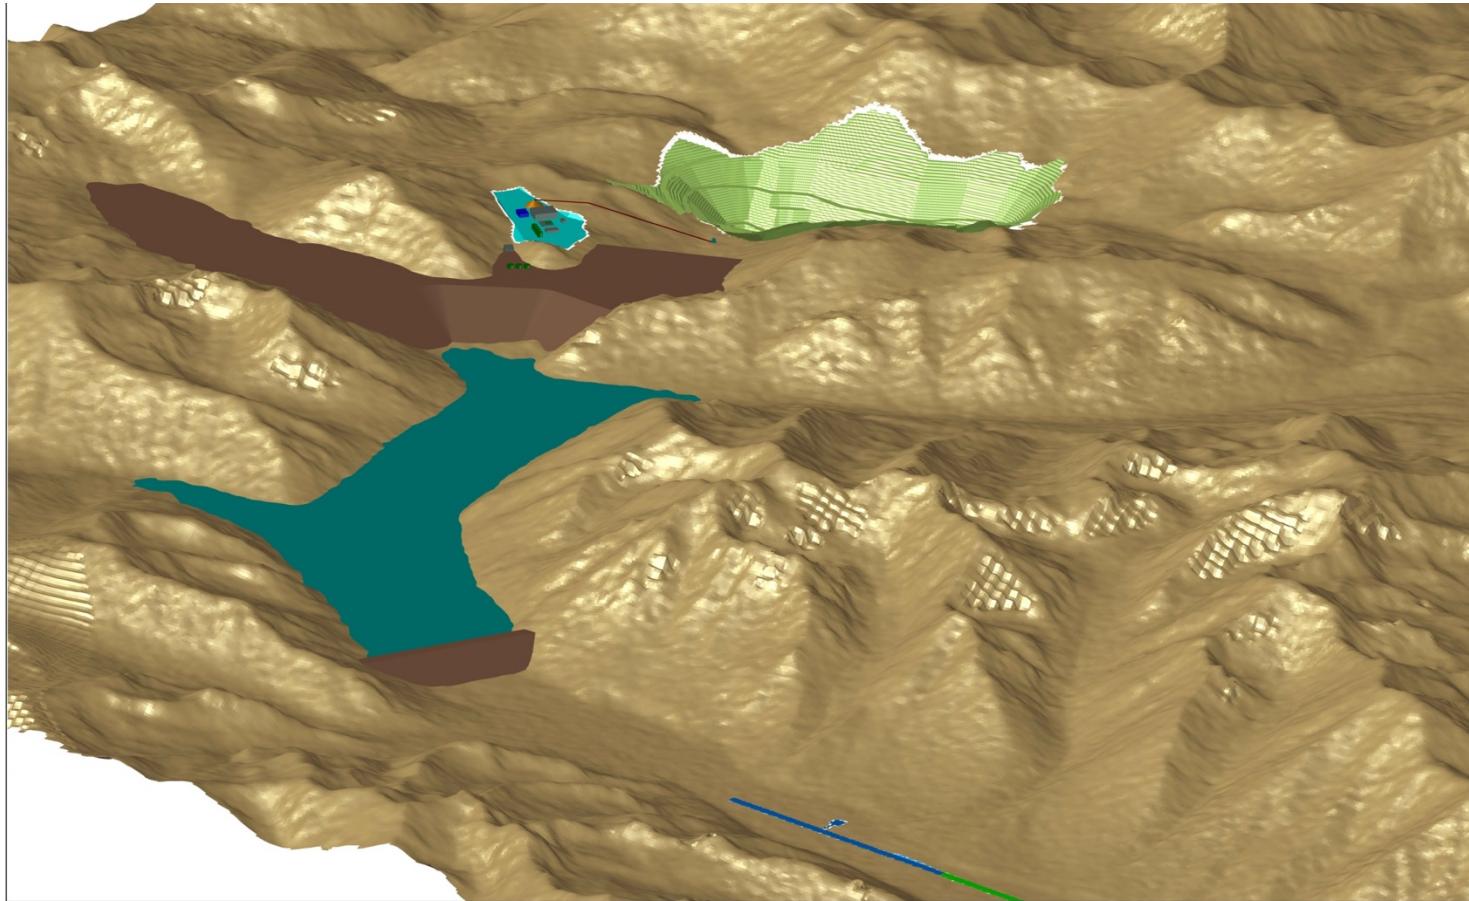

Los Azules Year 10

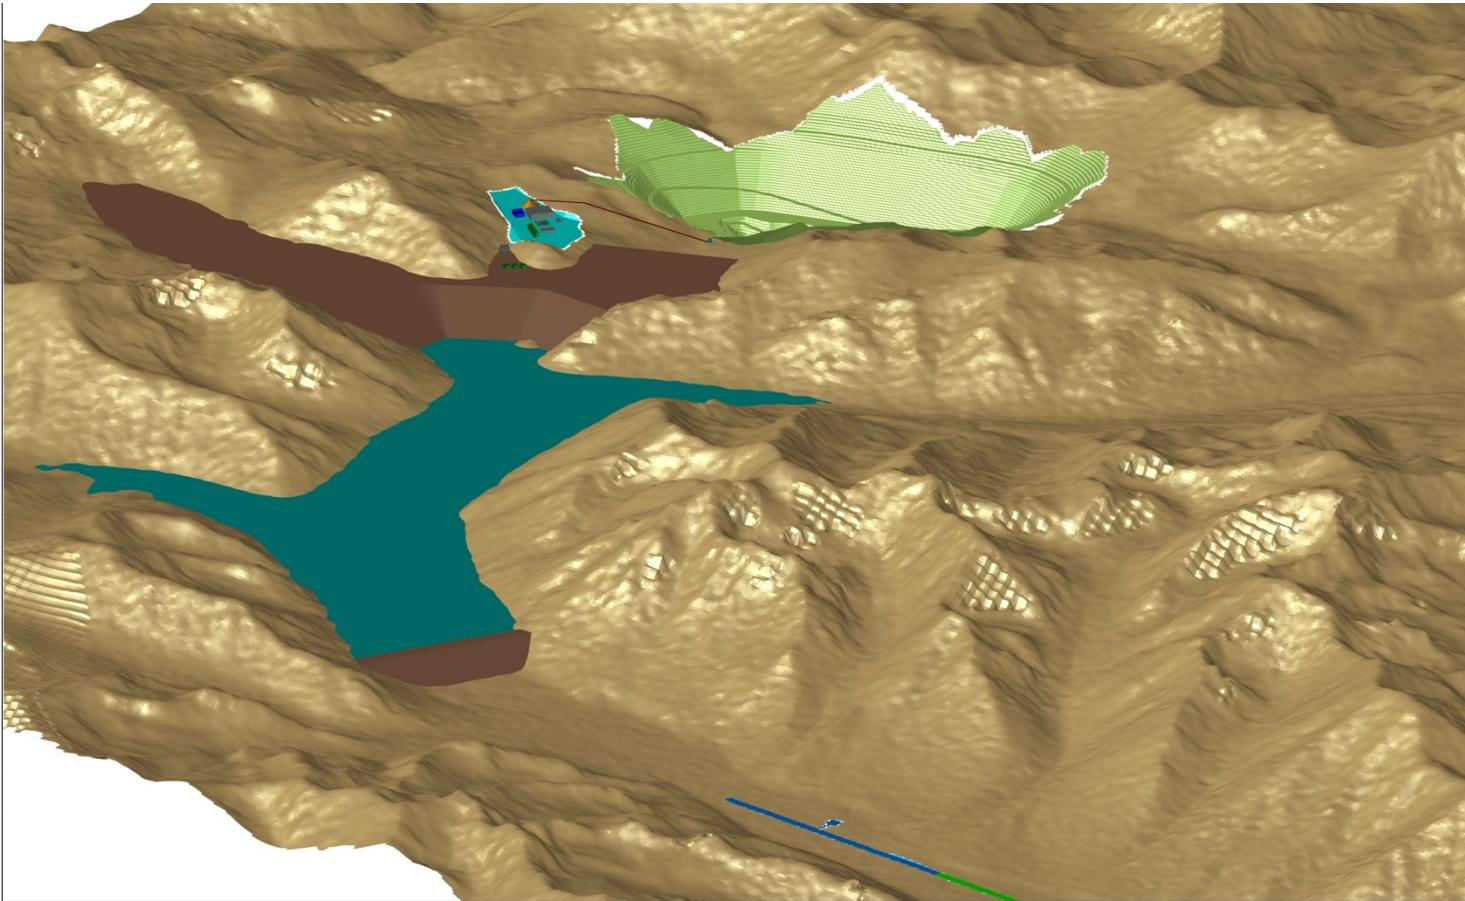

Los Azules Year 20

Los Azules Year 30

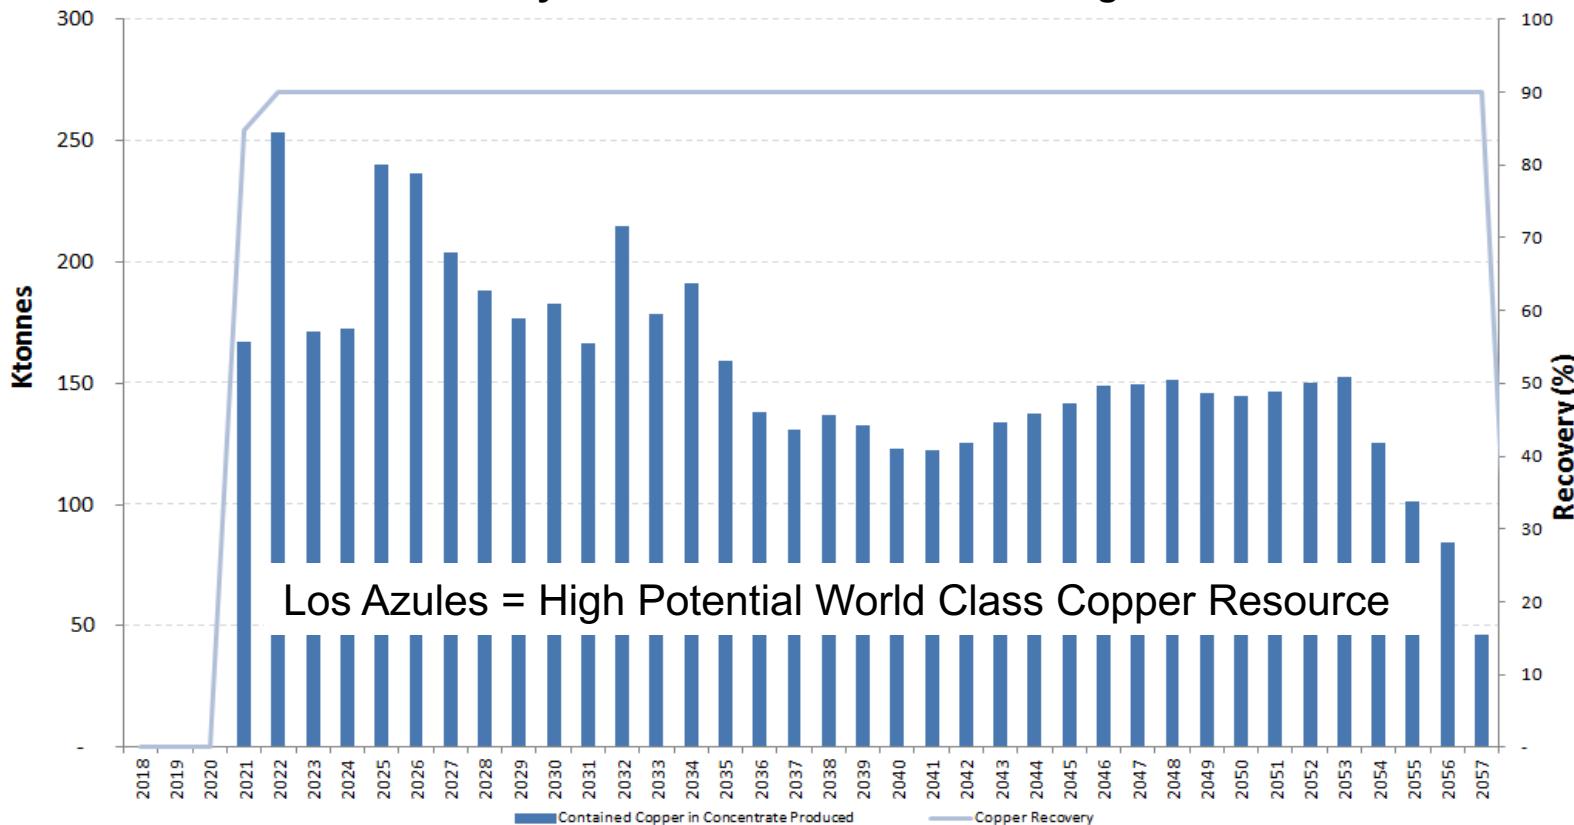

Los Azules Life of Mine – Ready for Rehabilitation

Life of Mine Average Production Exceeds 150,000 tons per year

Copper in Concentrate from Phased Implementation at 80-120ktpd
Recovery 90% for Cu and 67% for Au & Ag

Los Azules = High Potential World Class Copper Resource

McEwen Mining Exploration

- Strategic land positions in some of the best mining regions
- Upside exploration potential and organic growth opportunities
- Ongoing evaluation of exciting external opportunities

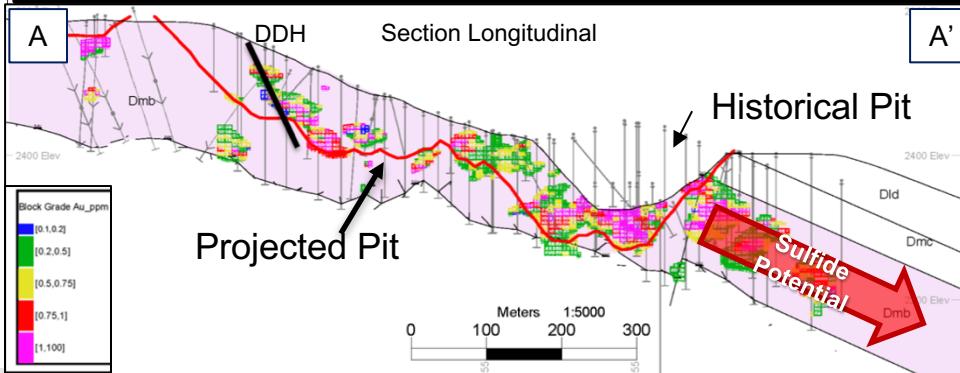

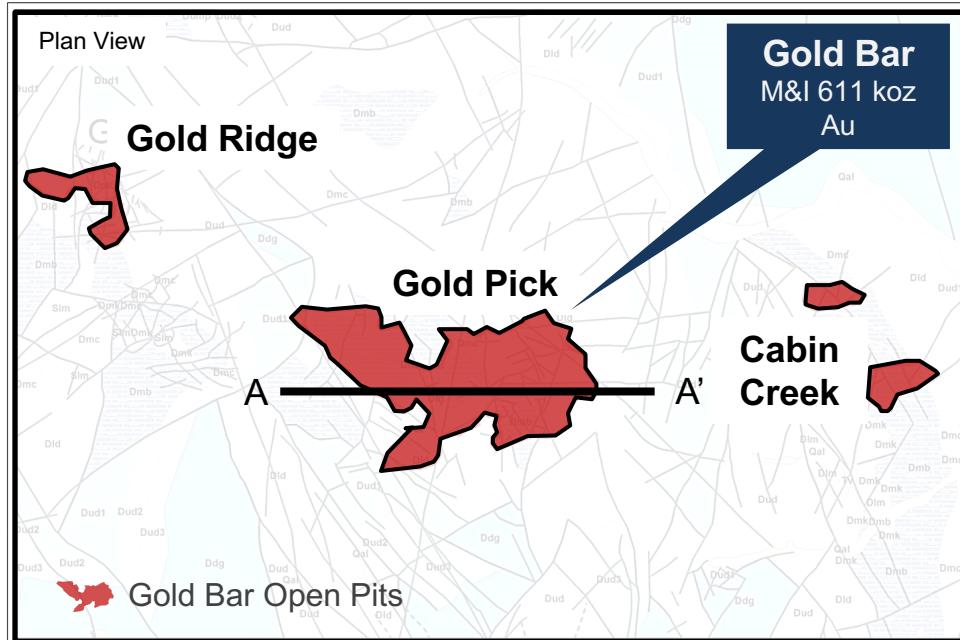

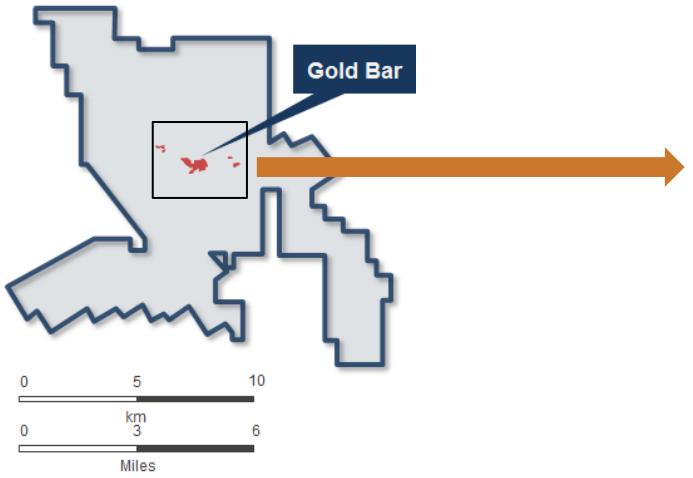

Nevada Strategic Land Position

- Along the Battle Mountain-Cortez trend
- Hosting the Gold Bar development project
- Drill ready targets with great exploration upside

Gold Bar Deposits

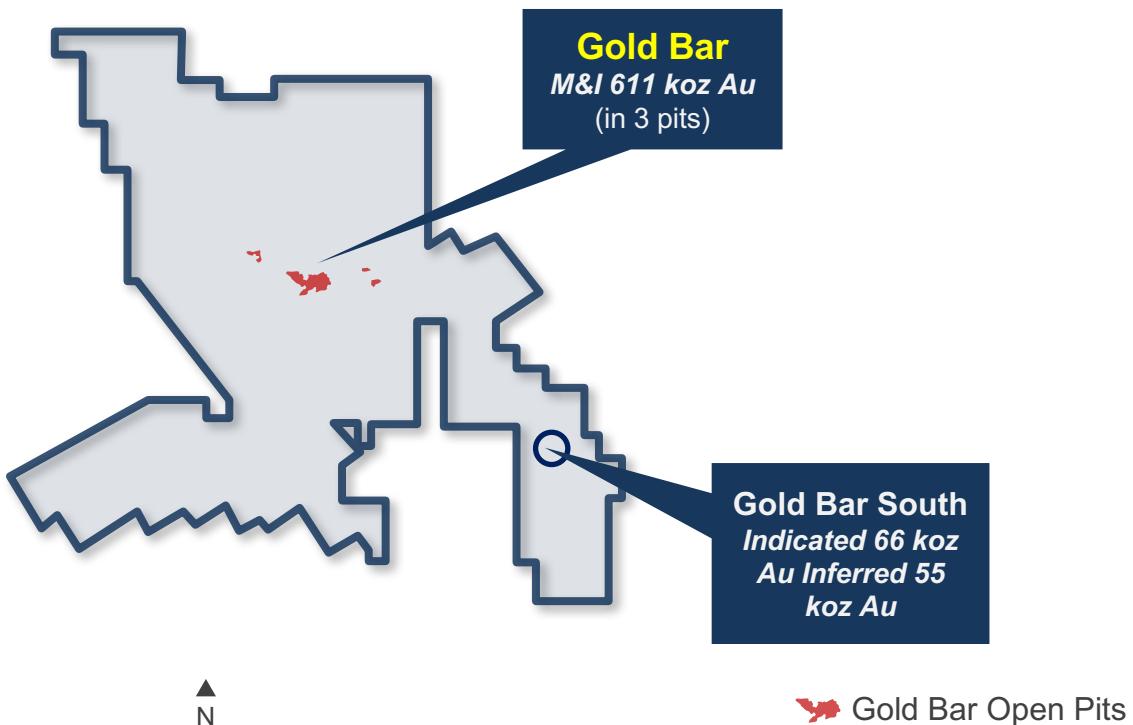

Cortez Trend

Nevada, USA

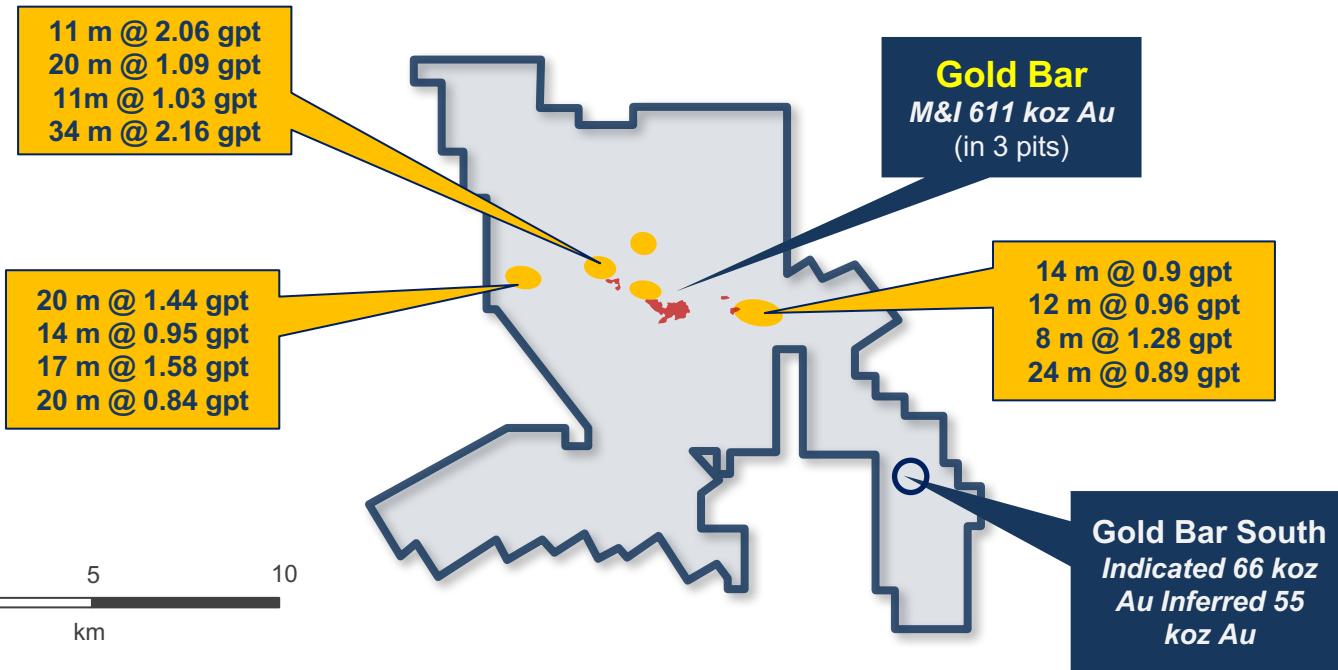

Gold Bar South Resources

Gold Bar Exploration Potential

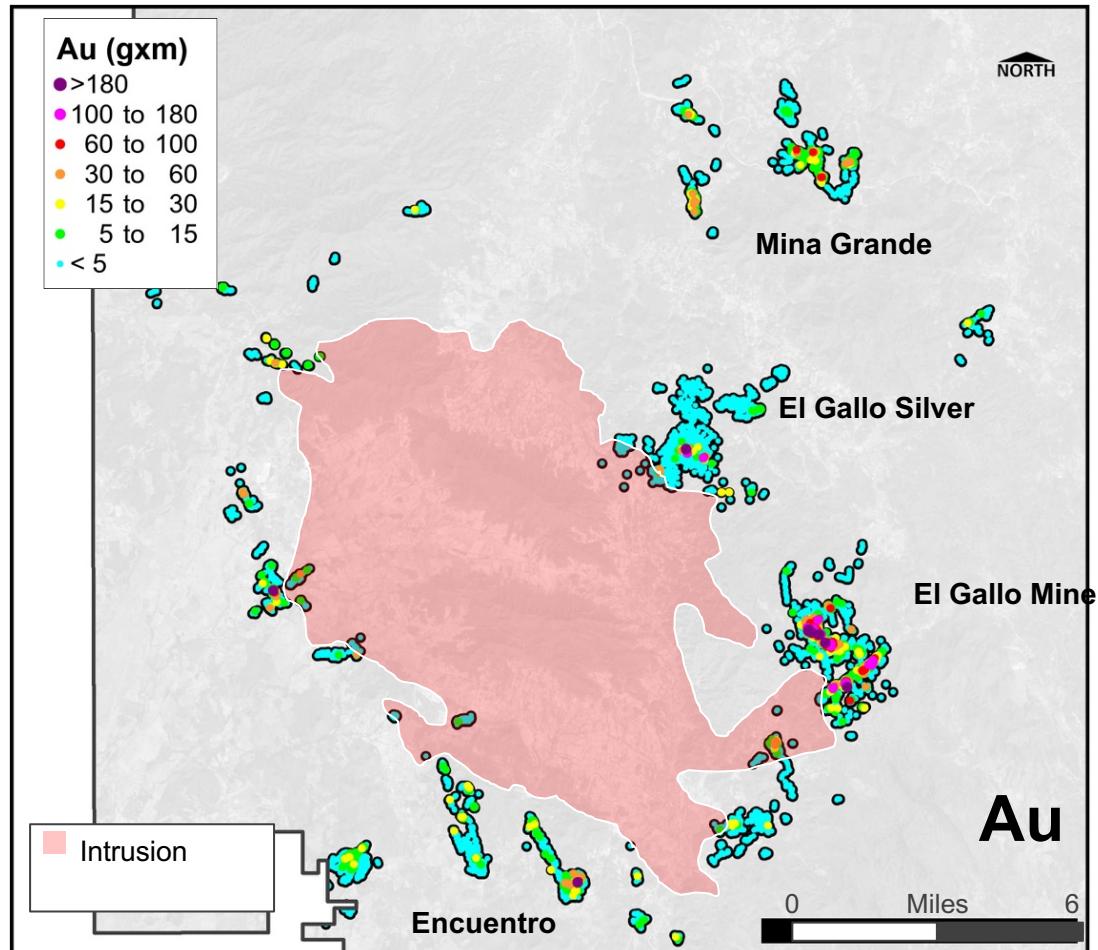

Nevada, USA

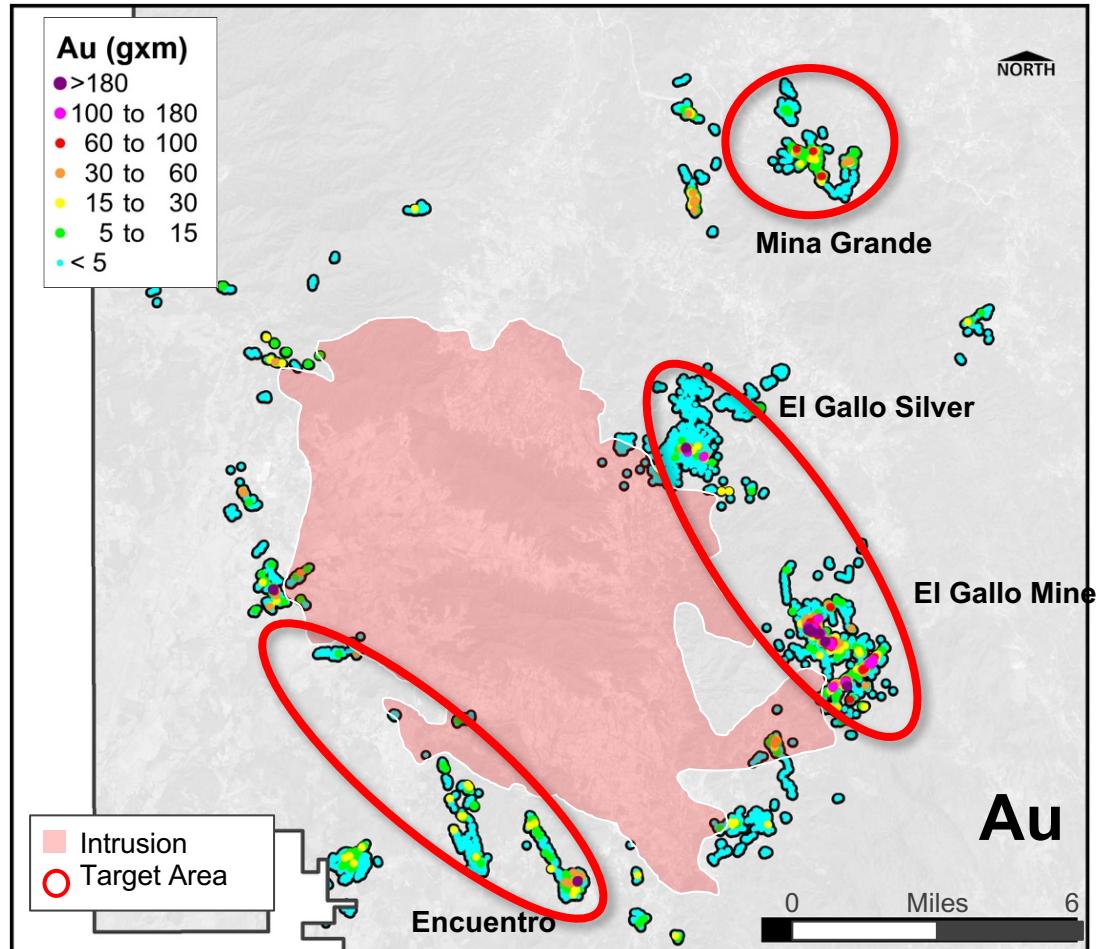

El Gallo Exploration (Mexico)

- Operation, development and exploration in a well-endowed district
- Exploration transiting from outcropping oxide to sulfides gold & polymetallic

El Gallo Exploration (Mexico)

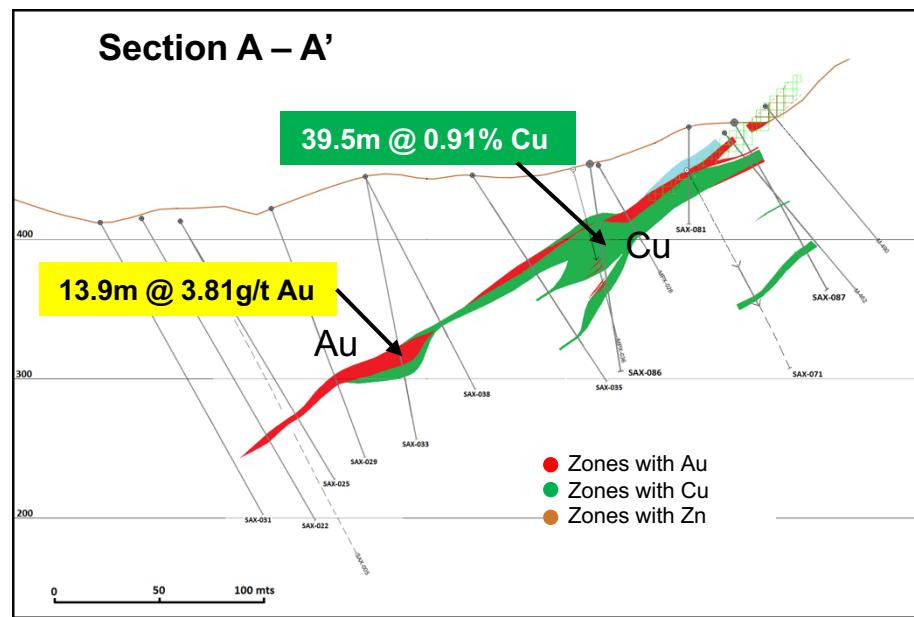

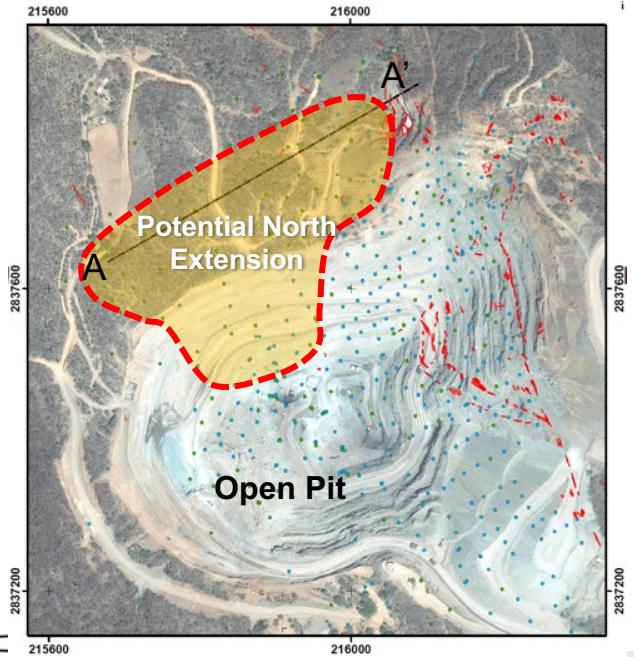

- Priority exploration areas:
 - El Gallo Mine Trend
 - Mina Grande
 - Encuentro

Exploration Potential

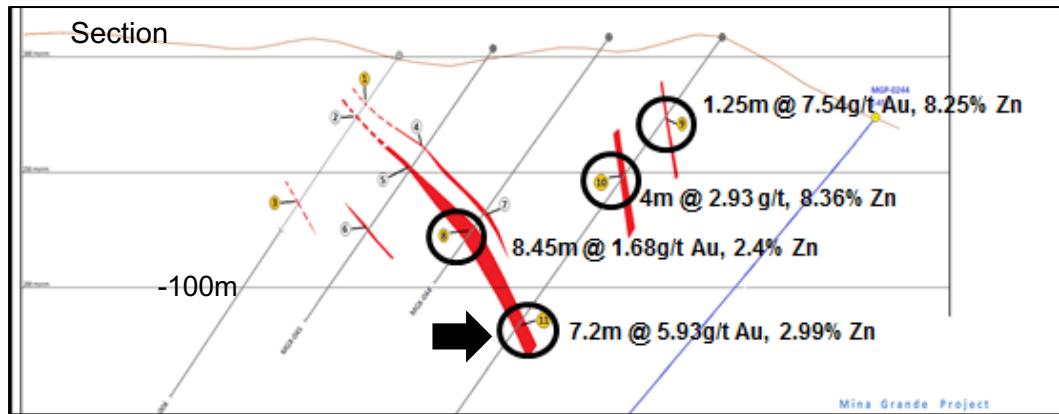

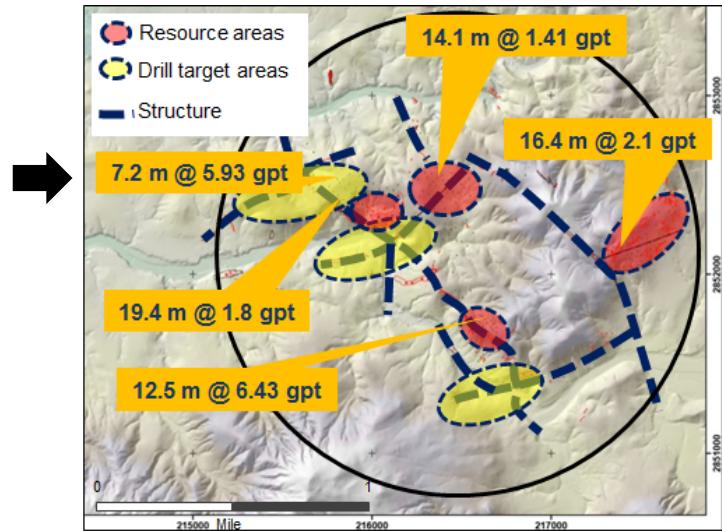

El Gallo North Extension Potential

- Gold and copper mineralization extend north of the active open pit

Mina Grande Target Area

- Extensive areas of alteration and mineralization
- Drilling on extensions of open mineralization and over new targets

Timmins Excitement – Location & Grade

Drilling Highlights

Davidson Tisdale

- 341.1 gpt Au / 3.4 m
- 197.3 gpt Au / 4.6 m
- 20.10 gpt Au / 23.1 m
- 121.2 gpt Au / 3.4 m

Fuller Deposit

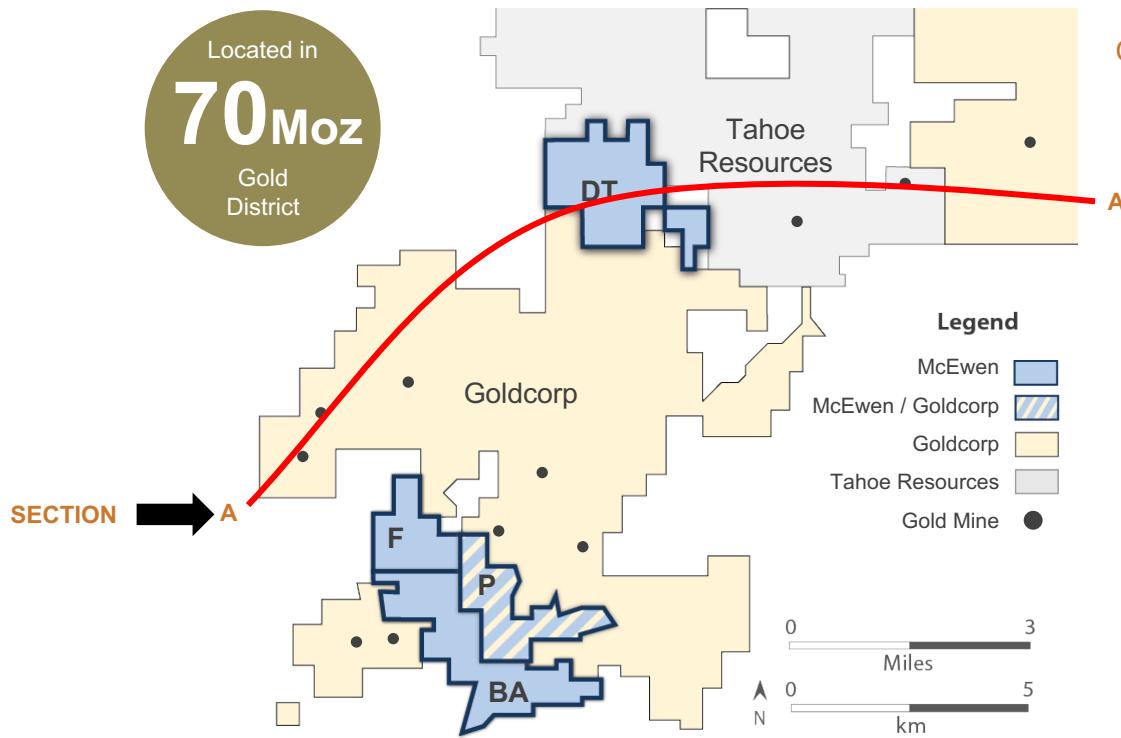

- 18.28 gpt Au / 7.9 m
- 5.76 gpt Au / 16.6 m
- 12.27 gpt Au / 3.7 m

Buffalo Ankerite

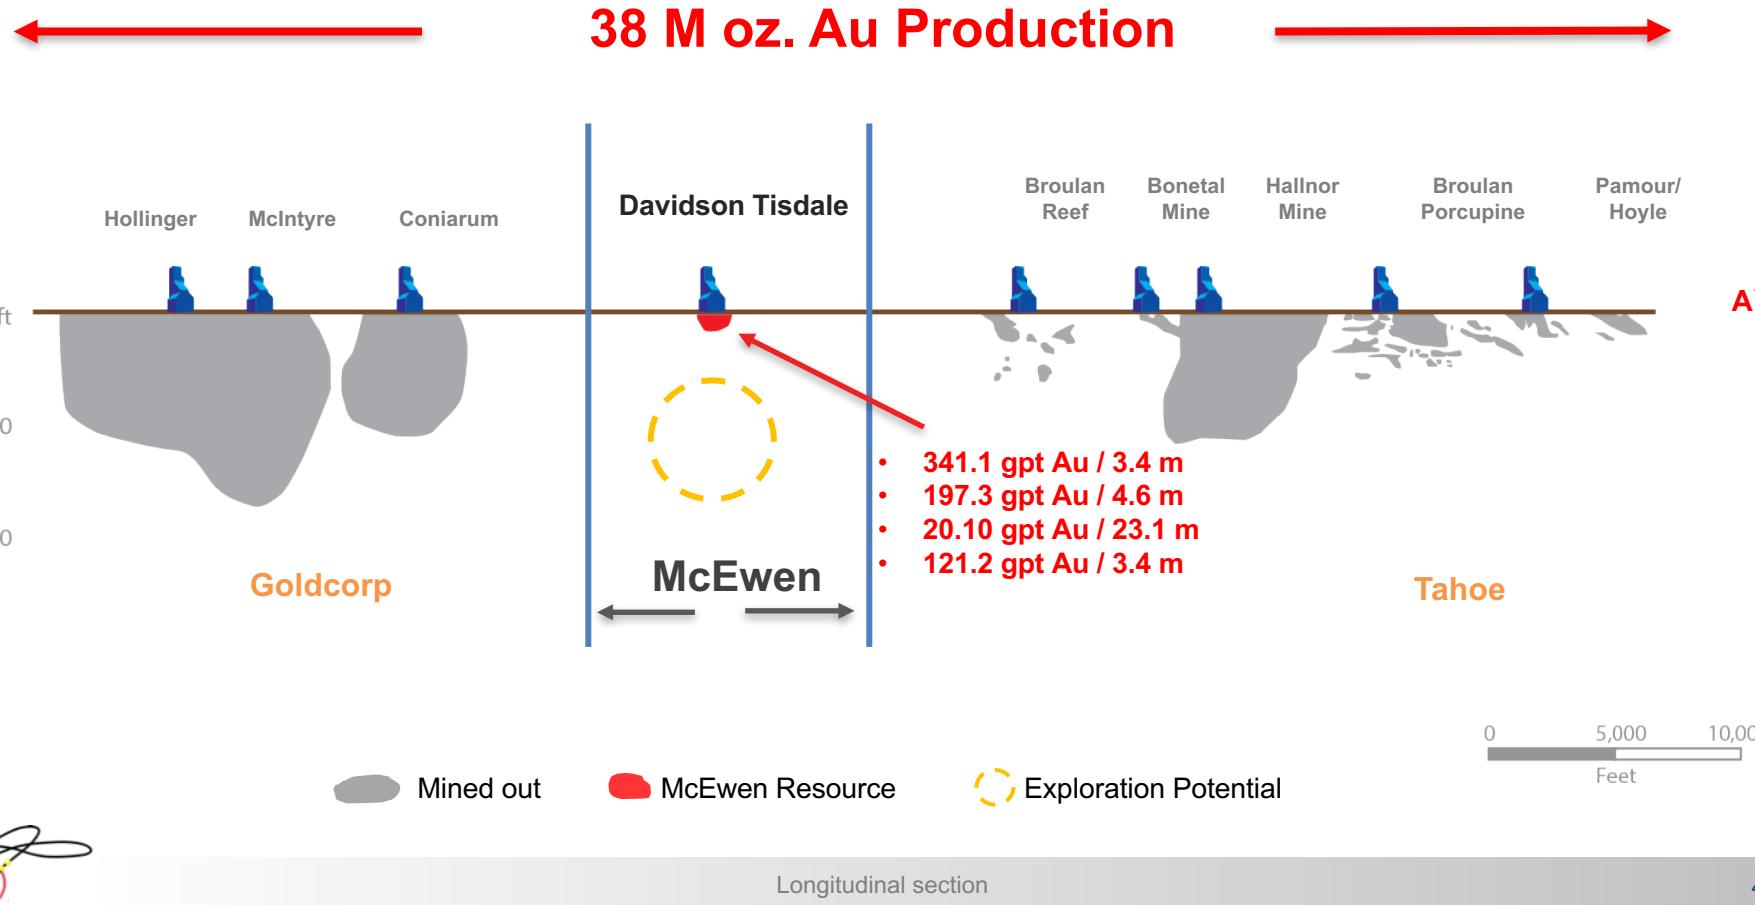

- 13.63 gpt Au / 9.1 m
- 19.62 gpt Au / 6.3 m
- 3.88 gpt Au / 26.5 m

Paymaster

- 30.99 gpt Au / 24.7 m
- 18.80 gpt Au / 8.0 m
- 5.25 gpt Au / 10.6 m

Timmins Historical Gold Production and Exploration Upside

Innovation

Reach Out Beyond Mining Community

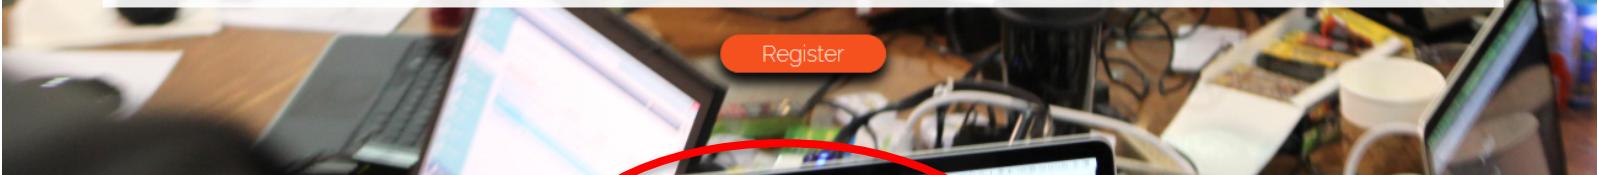

#HACKMINING

A 3-day Hackathon to Innovate the mining industry

 Date: May 12-13-14, 2017

 Time: 45-Hours from Friday 12th 6pm - Sunday 14th 3pm

 Venue: Cisco Innovation Centre, Toronto, Ontario

Register

SPONSORS

HATCH

<http://hackmining.cmic-ccim.org/>

#HackMining

Challenges:

- Transporting ore and waste from difficult-to-access areas
- Reducing the volume of mine tailings

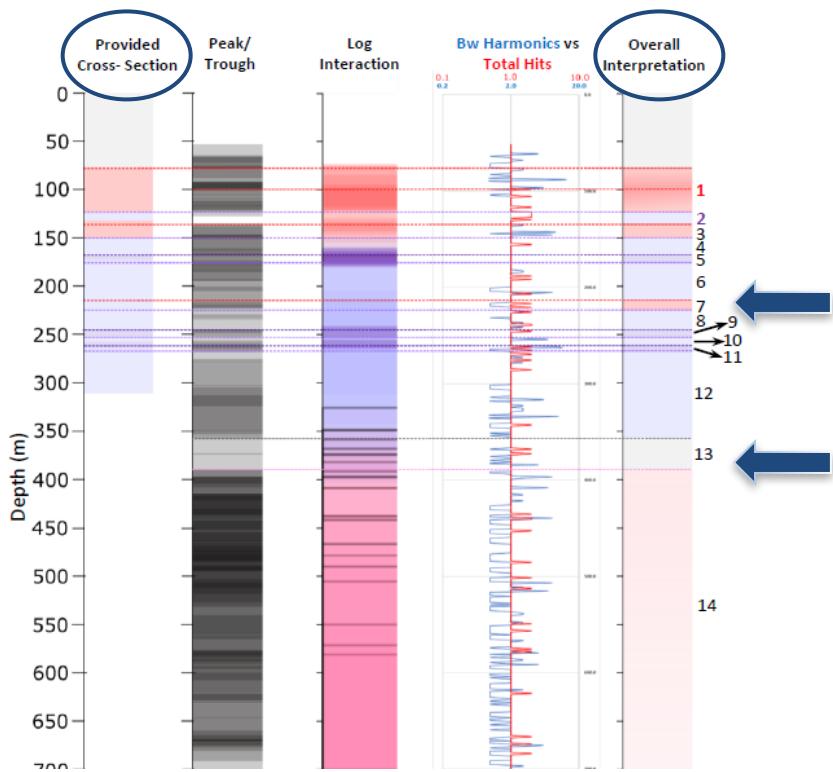

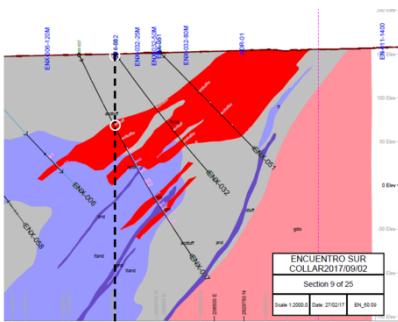

Over 50 participants from Business, Development, Design, Engineering and Science backgrounds.

Adrok

1. Scans identify potentially prospective layers similar to known mineralized structures.
2. Reduces total footprint and number of drill holes, permitting not required.

- Good correlation between “Provided” and “Interpretation”
- Found an extension worth investigating (#7)
- “Actual” drilling stopped at 300m, “Interpretation” predicts the “floor”

University of Toronto – Application of Unmanned Aerial Vehicles (UAVs) in Mining

1. Real-time, post-blast rock fragmentation analysis.
2. Hyperspectral analysis of post-blast muck piles to control ore grade and dilution.
3. Inspection and monitoring of surface excavations and earthworks.

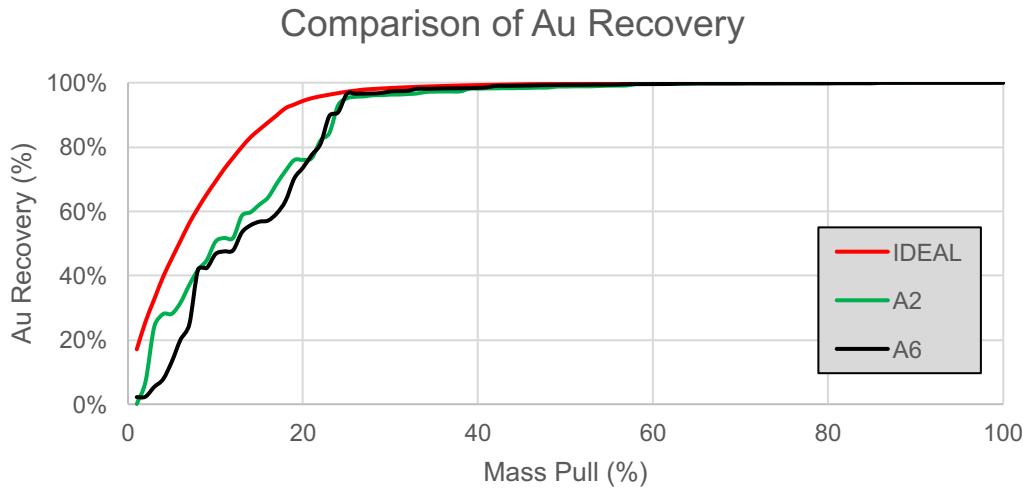

Outcome:

⇒ On-demand, fast, real-time, high-quality, automated data acquisition and feedback for mining operations.

Application - Ore Sorting

- Evaluated ore/waste samples from Lupita – Central
- Would significantly decrease processing and hauling costs and environmental impact.
- Ore sorting technologies are XRF, XRT, DE-XRT, Laser, Optical, Electromagnetic, NIR.

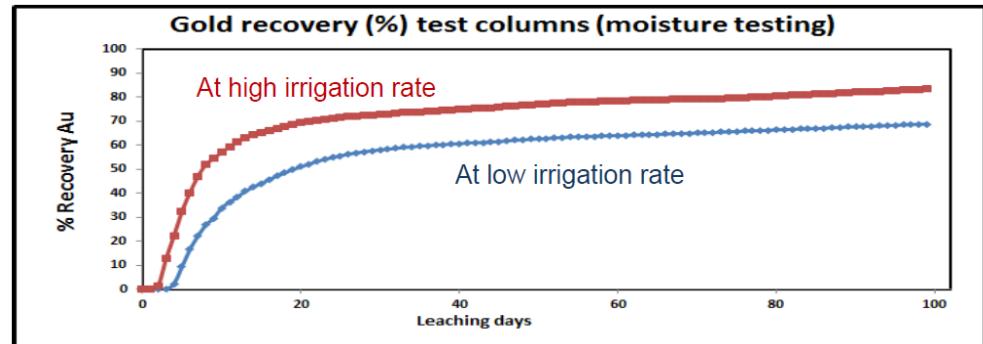

Scanimetrics - Leach Pad Sensors

- Moisture and compaction measurement.
- Provides feedback to operators to keep moisture in the “optimum” range.
